SAHIL BRAHMANKAR

AI Engineer | Python · SQL · RAG · LLM Applications

sahilbrahmankar.cv@gmail.com | +91-7972640500 | linkedin.com/in/sahil-brahmankar | github.com/SahilBrahmankar | Pune, India

PROFESSIONAL SUMMARY

Computer Engineering graduate who builds LLM applications end to end, including RAG pipelines, structured-output APIs and tool-calling agents, on strong Python and SQL fundamentals. AI Engineering Intern who shipped three projects, each tested on labelled data with measurable accuracy. Seeking an entry-level AI Engineer role to deliver reliable, real-world AI features.

TECHNICAL SKILLS

Programming: Python, SQL

ML & Data: Scikit-learn, Pandas, NumPy, Hugging Face Transformers (basics), Jupyter

LLM & Agentic AI: Prompt Engineering, Retrieval-Augmented Generation (RAG), Tool Calling, LangGraph, LlamaIndex, MCP (basics)

Databases & Vector Search: PostgreSQL, pgvector, ChromaDB

Backend & Deployment: FastAPI, Pydantic, REST APIs, Docker (basics), Hugging Face Spaces / Render

Tools: Git/GitHub

EXPERIENCE

AI Engineering Intern | *ThinkEasyLabs* [OCT 2026] – [JAN 2027]

- Built a FastAPI service that uses an LLM to extract data from documents into validated JSON, reaching [X]% accuracy on a [N]-document labelled test set.
- Developed a RAG question-answering pipeline with source citations, improving retrieval hit rate from [X]% to [Y]% on [N] test questions.
- Added response caching and prompt improvements, reducing average API cost per query by [X]%.
- Wrote automated tests to catch prompt and retrieval regressions before code was merged.

PROJECTS

Ask the Docs: RAG Q&A with Citations | *Python · LlamaIndex · pgvector · sentence-transformers* [2026]

- Built a question-answering system over [corpus] that cites its sources and says "I don't know" when the answer is not in the documents.
- Compared [3] setups (chunk size, vector vs. hybrid search, with/without reranker) on [40] test questions; best setup raised hit rate from [X]% to [Y]%. [Live link]

Document-to-JSON Extraction API | *Python · FastAPI · Pydantic · PostgreSQL · Gemini API* [2026]

- Built an API that turns invoices and resumes into validated JSON with error handling, and stores results in PostgreSQL.
- Created a [30]-document labelled test set and raised field-level accuracy from [X]% to [Y]% through prompt iteration and retry logic. [Live link]

Text-to-SQL Analyst Agent | *Python · LangGraph · PostgreSQL* [2026]

- Built an agent that reads a database schema, writes SQL on a read-only connection, fixes its own errors and explains the results.
- Achieved [X]% success on [25] test questions and documented [N] failure cases with safeguards such as query limits and approval steps. [GitHub link]

EDUCATION

B.E. Computer Engineering | MVPS's KBTCOE, Nashik (CGPA 7.9) | 2022 – 2026

CERTIFICATIONS & ACHIEVEMENTS

- Python for Data Science, NPTEL (Swayam), Ministry of Education, Govt. of India
- Google Cloud Certification, Google Cloud Skills Boost; First Prize, Google Cloud Quiz Competition (Aug 2023)
- MERN Stack Development, Edunet Foundation (EY GDS & AICTE); Selected at college-level screening, SIH 2025
